## I. Amendments to the Claims

The listing of claims shall replace all prior versions, and listings, of claims in the application.

## Listing of Claims

- 1. (Previously Presented) A method of blocking or reducing allergic rhinitis in a mammal resulting from the interaction of IgE antibodies present in said mammal upon contact with the corresponding antigen, by the administration to said mammal of a therapeutically effective amount of a neurotoxin (CnT) to treat allergic rhinitis, wherein the CnT is isolated or purified from a species of Clostridia selected from the group consisting of C. botulinum, C. butyricum and C. beratti.
- 2. (Original) The method of claim 1 wherein the mammal is a member of H. sapiens.
- 3. (Previously Presented) The method of claim 2 wherein the neurotoxin is isolated or purified from C. hotulinum.
- 4. (Previously Presented) The method of claim 3 wherein the neurotoxins (BoNT) are serotypes A, B, C1, D, E, F or G.
- 5. (Cancelled)
- 6. (Original) The method of claim 1 wherein CnT is administered by contact with absorbant pledgets having CnT absorbed thereon.
- 7. (Original) The method of claim 1 wherein CnT is administered by contact with biodegradable carrier containing CnT.

Appl. Serial No. 10/535,504 Amdt. dated May 18, 2010

Reply to Final Office Action dated February 18, 2010

- 8. (Original) The method of claim 1 wherein CnT is administered by injection.
- 9. (Previously Presented) The method of claim 1 wherein CnT is administered by myringotomy through tympanic membranes.
- 10. (Original) The method of claim 1 wherein CnT is administered by injection into the pterygoplatine space through the palate.
- 11. (Original) The method of claim 7 wherein CnT is administered to pass through the nasal wall to the sphenopalatine ganglia.
- 12. (Previously Presented) The method of claim 1 wherein CnT is administered by inhalation of an aqueous mist containing said CnT.
- 13. (Original) The method of claim 1 wherein CnT is administered by injection to the nasal mucosa.
- 14. (Previously Presented) The method of claim 1 wherein CnT is administered by application of a suppository containing said CnT.
- 15-17. (Cancelled)
- 18. (Original) The method of claim 1 wherein the amount of CnT administered per administration is between about 0.1 and about 1000 units per administration.
- 19. (Original) The method of claim 1 wherein the amount of CnT administrated per administration is between about 1 and about 100 units per administration.
- 20. (Original) The method of claim 1 wherein the amount of CnT administrated per administration is between about 1 and about 20 units per administration.

Appl. Serial No. 10/535,504 Amdt. dated May 18, 2010 Reply to Final Office Action dated February 18, 2010

## 21-25. (Cancelled)

- 26. (Previously Presented) A method of blocking or reducing allergic dermatitis in a mammal resulting from the interaction of IgE antibodies present in said mammal upon contact with the corresponding antigen, by the administration to said mammal of a therapeutically effective amount of a neurotoxin (CnT) to treat allergic dermatitis, wherein the CnT is isolated or purified from a species of Clostridia selected from the group consisting of *C. botulinum*, *C. butyricum* and *C. beratti*.
- 27. (Previously Presented) A method of blocking or reducing allergic rhinitis in a mammal resulting from the interaction of IgE antibodies present in said mammal upon contact with the corresponding antigen, by the nasal administration to said mammal of a therapeutically effective amount of a neurotoxin (CnT) to treat allergic rhinitis, wherein the CnT is isolated or purified from a species of Clostridia selected from the group consisting of C. botulinum, C. butyricum and C. beratti and wherein the administration is selected from the group consisting of.
  - (i) contact with absorbant pledgets having CnT absorbed thereon;
  - (ii) contact with biodegradable carrier containing CnT;
  - (iii) myringotomy of CnT through tympanic membranes;
  - (iv) injection of CnT into the pterygoplatine space through the palate;
  - (v) application of a suppository containing CnT;
  - (vi) an amount of CnT between about 0.1 and about 1000 units per administration;
  - (vii) an amount of CnT between about 1 and about 100 units per administration; and
  - (viii) an amount of CnT between about 1 and about 20 units per administration.
- 28. (Previously Presented) The method of claim 1, wherein the administration is topical to the nasal cavity.
- 29. (Previously Presented) The method of claim 26, wherein the CnT is incorporated in liposomes.

Appl. Serial No. 10/535,504 Amdt. dated May 18, 2010 Reply to Final Office Action dated February 18, 2010

- 30. (Previously Presented) The method of claim 26, wherein the CnT is incorporated in a lyophilized powder, liquid solution, cream, ointment, aerosol or liposomes.
- 31. (Previously Presented) The method of claim 26, wherein the CnT is administered between about 0.1 and about 1000 units per administration.
